Subject: OR CZARA Release slightly revised
Attachments: OR CZARA PR Draft 2 Rollout -- MH edits 1-20-15.docx

I made a few changes. Dennis suggests we not mention funding in the release, but be ready to respond to questions about it.

I struggled with a sentence near the bottom – wanting to say that the state did address some additional elements since the proposed disapproval, but couldn't figure out how to say it...

Also, could we add some more specifics about how/why the forest practices' runoff damages fish habitat? Culverts blown out, legacy roads that result in silty runoff that chokes the baby fish?

After you give comments on this, we'll send it to NOAA tomorrow. We'll see how they react. Quite different from the original.

Thanks!

Marianne
